TRITON-X

microsatellites for newspace

affordable | fast | scalable

TRITON-X

flexible

Compatibility with ride-share and multi-satellite launches for deployment of constellations

dependable

5-year mission life in LEO ensured by rad-tolerant supervision logic and smart redundancy

powerful

Best-in-class computing power thanks to our versatile System-on-Chip processing platform

affordable

Slashing the costs to procure, launch and operate your in-orbit mission assets

fast

Spacecraft delivery in less than six months from order for standard mission configurations

scalable

Expandable avionics core and power modules for optimal fit of bus size to your application
